SKILLS

Languages: Python, SQL, Java (Basics)

Libraries: NumPy, Pandas

Tools: GitHub, VS Code, Streamlit, Jupyter Notebook

Core Concepts: OOPs, DBMS

Soft Skills: Analytical Thinking, Team Collaboration, Adaptability

PROJECTS

Room8 – Student Room Rental Platform 2026

- Developed a platform to help students find affordable rental rooms near universities.
- Implemented filtering based on budget, location, and available facilities.
- Addressed lack of student-specific listings and unclear information.
- Designed a user-friendly interface for easy room discovery.

AI Virtual Try-On & Outfit Matching System 2025

- Developed an AI-based virtual try-on system that allows users to visualize clothing items on their own images.
- Implemented a feature to display shirts and pants on user images for better outfit matching and selection.
- Designed a dynamic outfit combination system enabling users to try multiple shirt and pant combinations before purchase.
- Utilized computer vision techniques for body detection and realistic clothing overlay.
- Improved user decision-making by providing personalized visualization instead of model-based previews.

Fake Certificate Detection System 2025

- Built a system to detect fake academic certificates using image processing techniques.
- Used Python and OpenCV to analyze document features and verify authenticity.
- Identified anomalies such as tampered text and mismatched layouts.

TRAINING

Python Programming & Automation Training – LinuxWorld Informatics Pvt. Ltd. Nov 2025

- Completed 40+ hours of hands-on training in Python programming and automation.
- Gained practical experience in Flask web development, REST API development, and Streamlit dashboards.
- Worked on automation tasks including email, SMS, and WhatsApp messaging systems.
- Developed multiple real-world applications and improved problem-solving skills.
