SKILLS

Languages: Python, SQL, Java (Basics)
Libraries: NumPy, Pandas
Tools: GitHub, VS Code, Streamlit, Jupyter Notebook
Core Concepts: OOPs, DBMS
Soft Skills: Analytical Thinking, Team Collaboration, Adaptability

PROJECTS

CertiCheck – University Certificate Verification Platform 2026

- Developed a platform to help universities verify the authenticity of student certificates submitted for internships, courses, and workshops.
- Enabled faculty members to identify fake or tampered certificates before approval.
- Used Python and OpenCV to analyze certificate features and validate documents.
- Reduced manual verification time by providing a simple and centralized verification system.

Linux world-Python mini project 2025

- Built interactive dashboards using Streamlit.
- Developed an AI-based chatbot application.
- Implemented Text-to-Speech and Speech-to-Text systems.
- Automated email workflows using Python.
- Developed RESTful APIs using Flask.

TRAINING

Python Programming & Automation Training – LinuxWorld Informatics Pvt. Ltd. Nov 2025

- Completed 40+ hours of hands-on training in Python programming and automation.
- Gained practical experience in Flask web development, REST API development, and Streamlit dashboards.
- Worked on automation tasks including email, SMS, and WhatsApp messaging systems.
- Developed multiple real-world applications and improved problem-solving skills.
